## Warehousing & Distribution Consulting

---

**Transport and warehousing are simple;** it's about getting your products to your customers on time. That's all there is to it. Unfortunately, **'simple' doesn't always mean 'easy'**. In fact, logistics is arguably the most complicated part of any product-based business.

Our expertise lies in being able to understand your needs and to provide you a solution to meet those needs as and when required, **from chaos through to calm.**

In other words, we'll help **take you to the next level.** And just as importantly, we'll help keep you there.

Our services include:

- ✓ Auditing warehousing and distribution functions
  - ✓ Cost down strategies
  - ✓ Data analysis
  - ✓ Inventory management process improvements and reviews
  - ✓ Key Performance Indicator implementation and review
  - ✓ Warehousing and distribution Consulting
  - ✓ Sales & Operations Planning
  - ✓ Strategy Development
  - ✓ Standard Operating Procedure development
-

## Project Management

---

In its most basic sense, **a project is a group of individual tasks** that work together to meet a pre-determined goal. No matter what tasks or outcomes you need to improve, effective, efficient project management is the key.

In order to minimise the risk associated with your projects, three things are required: **knowledge**, hands on **experience** and a **specialised project management tool kit**.

At STL Warehousing, we minimise risk by working closely with our clients, utilising our experienced consultants and online project management tools and ticketing system to minimise and communicate the impact of any change that is being made during your logistics project.

Our services include:

- ✓ Green Fields
  - ✓ Implementation or re-implementation of warehouse management systems
  - ✓ Layout or re-layout of a warehouse
  - ✓ Moving a warehouse **to** or **from** a location
  - ✓ Outsourcing
  - ✓ RFQ / RFT management
-

An underperforming warehouse can **cost a great deal of time** and money.

**Inefficiencies and mistakes** can lead to overstocking or understocking, late or damaged deliveries, customer credits and cash flow difficulties. And they will always lead to **customer dissatisfaction**.

We're experts at resolving complex operational and organisational issues to enable your **warehouse to achieve its true potential**. Our specialists deliver improved customer service, reduced inventory variances, raised productivity, reduced cost and reduced response time when processing orders. Benefits that fall **straight to the bottom line**.

Our services include improvements, reviews and implementing changes to:

- ✓ Receiving
  - ✓ Put-a-way
  - ✓ Replenishment
  - ✓ Picking
  - ✓ Packing
  - ✓ Dispatch
  - ✓ 3PL Operations
  - ✓ Cycle counting
  - ✓ KPI's
  - ✓ Layout
  - ✓ Security
  - ✓ Housekeeping
  - ✓ Warehouse flow
  - ✓ 3PL Contract Reviews and negotiations
- 

## STL Warehousing - consultants

---

**Established in 1998 as Supply Today** our lean, practical, fresh perspective helps you become more competitive and gives you the 'on-the-spot' solutions you need to lead your industry.

We didn't become one of Australia's leading boutique logistics consultancies without good reason:

- We're extremely good at achieving results and resolving logistics and warehousing problems.
  - We're dedicated to raising the bar in what has traditionally been a low tech, blue collar environment.
  - Our commitment to excellence and professionalism is second-to-none.
  - We specialise in the application of technology solutions and lean to logistics and warehousing, so you get maximum process visibility and real time information.
  - We're extremely resourceful and consistently accept responsibility beyond the task at hand.
  - We deliver exceptional economic returns, time and again.
-
